PROJECT AND RESEARCH

Mwanga Prototype, AkiraChix
Project Lead

Feb2023 - Oct 2023

- Mwanga is a dashboard and a mobile application to be used by community healthworkers and NGOs in empowering their efforts to improve child healthcare by identifying delayed milestones cases and tracking them. In a diverse team we used NextJS and Kotlin to build the user interface of the dashboard and mobile application. The backend of the system was built in python3 using Django REST framework.
